Festoon Bulb Instructions

These bulbs are fragile; hence they are packed individually for transportation and protection against breakage. The easiest way to hang festoon lights; Use 2-3mm cable ties, hang a section, fit bulbs as you go.

Equipment required :- Ladder 2/3mm cable ties 2/3 persons Storage Box 16a RCD protected supply.

1. Open the box without tearing the opening/closing flap
2. Withdraw the plastic protective blister packaging
3. Remove the bulb.
4. Screw the bulb into the festoon wiring loom carefully to avoid crossing the thread.
5. The bulb only needs to be finger tight to make a weather proof seal
6. Retain the clear plastic blister package protection and the box.
7. Store the packaging in a dry place.
8. When you de-rig the reverse procedure should be adopted.

Please ensure the bulbs are fitted and removed by a competent person.

ADW accident damage waiver does not cover broken bulbs, wet, damp, or missing packaging.

Replacement cost is the most economical solution, new for old, not indemnity

T&Cs apply.
