

# TFL & PCN Surcharge @ 20p per Kilo Weight

You may have heard that there is a National Shortage of drivers in the UK caused by Brexit and the Coronavirus pandemic Covid-19.

The London Mayor Sadiq Khan has used Transport for London (TFL) to expand the Ultra-Low Emission Zone <https://tfl.gov.uk/modes/driving/ultra-low-emission-zone/uhez-expansion>

Combined with the extension of hours of the London Congestion Zone to capture more revenue we are faced with additional transport charges for deliveries.

Our drivers are under immense pressure to avoid complicated no go zones which seem to have been developed to capture more revenue and slow down traffic causing more delays and fines as we go about our business.

It for the reasons above that we are now charging 20p per kilo of delivered goods within the M25 and London to cover addition costs until such time that the financial impact of the situation resolves.

Kind Regards

Malcolm Skerrett
