- 5.0 Gantries & optional extras

TRADITION, QUALITY AND CARE

H Fereday & Sons was established in 1862 and is still today owned by the family. Chairman David Fereday is the great grandson of the founder and continues the unique tradition of a family company manufacturing in the UK.

CATERLUX HOTCUPBOARDS AND BAINS MARIE

CATERLUX cupboards provide a multi-various choice from small plate warmers to 1750mm long units. There are two distinct ranges - the heavy duty ATLAS and the medium duty GALAXY range hotcupboards.

Caterlux conforms to the necessary European Directives LVD2006/95/EC, EMC2004/108/EC and the important Gas Directive 2009/142/EC.

Production is quality assured to ISO:9001

THE CATERLUX 'ATLAS' RANGE

These heavy duty cupboards have a complete variety of modules and options which can be 'mixed and matched' to meet the exact requirements of the chef.

There are 4 standard lengths between 760mm and 1750mm with a variety of plain and bain marie tops. There is the option of electric, natural or LP gas heating.

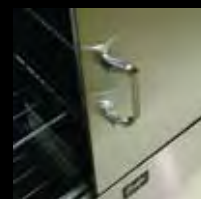

The diverse choice of extra fittings includes doors both sides, tray rails, castors and a comprehensive range of heated gantries and over shelves.

An innovation is the unique three sliding door system which facilitates access to the centre of the cupboard and the loading of wide baking dishes.

THE CATERLUX 'GALAXY' RANGE

This comprises a choice of 11 electrically heated cupboards ranging from the small GEMINI plate warmer to the ORION/APOLLO 1750mm long plain/bain marie cupboards. These can be fitted with all the various heating gantries and over shelves.

The ORION/APOLLO size 2/3 units are available as a DELUXE version in a teak wood grain finish.

GALAXY RANGE
