The Single Stage Petrol Snow Blower Thrower no shovelling this winter with this powerful, very easy to use snow thrower that will effectively clear the snow from your driveway in next to no time. This large snow blower has a powerful engine inside, and uses a single high speed auger that moves the snow into the machine and out the discharge chute to clear your pathway.

This snow blower is able to handle snow up to the depth of 8 inches, and the auger digesting helps break down the snow for getting rid of it. The McCulloch Petrol Single Stage Snow Blower has a rotating discharge chute to get rid of the snow in different directions, and the wheels on the blower are not driven by the engine, allowing you to push it at whatever speed you choice.

The McCulloch Petrol Single Stage Snow Blower has a foldable handle for packing the snow blower away after use, and the thick sturdy handle has a lever for turning the blower on when walking around with it.

Features:

- Compact single-stage snow blower for clearing drives and pathways
